### Consultation questions

**1 If you wish to make general comments on any aspect of the Issues and Options Habitat Regulations Assessment (HRA), please set out your comments below specifying which paragraph/section your comment relates to.**

**Please provide reasons for your answers:**

The main problem seems to be how to balance the requirements of local residents with the needs of the natural world. It is good to see how well-researched the consultation has been. In my opinion, the needs of nature are paramount in view of the degradation already caused and the reliance of human populations on a well-functioning natural environment. As for specific comments, most of the options I've read carefully seem uncertain in their effects.

**2 Please set out the changes you consider necessary to resolve the issues you have identified above. Please explain why these changes will improve the HRA.**

**Please provide reasons for your answers:**
